

Eric Hjørleifson®  
SIGNATURE SERIES

## INTRODUCING THE ERIC HJORLEIFSON SIGNATURE PACK SERIES

Defining yourself as a skier is about developing your own style. For Eric Hjørleifson, the equation is simple: Ski fast, pick nasty lines in harsh terrain, and throw that cork 720 off any natural feature you can find. Ski-film directors covet Hjørleifson's big-air-meets-big-mountain ways. He has been called "the future of skiing" by some of the biggest names in the business. Eric decided he wanted to design his own packs. So working with the Deuter Design team, they came up with a very special series of packs that incorporated all of the elements that make the definitive performance Freeride packs. Their unique mono-colour look mimics the famous Deuter Tauren mountaineering packs from the 40's, afterall it is Deuter's 110 year anniversary! Retro-future....eh?

### EH GUIDE

*This is the pack I have used almost every day for the last three years, because it is so versatile. It easily accommodates and carries all the gear for serious missions in the backcountry. The Guide also lightens up with the removable X-Frame Alpine backsystem and compresses down enough for those minimalist days filming from the heli or just hitting up some slack country around the ski hill. - E.H.*

*The Guide combines Deuter's classic proven top loading pack design with a few specific improvements wintertime fun.*

- Colour: Classic Khaki
- removable aluminium X-Frame Alpine backsystem
- flexible hipbelt, side support but thin in front for easy "high knees" action
- smooth fabric back panels for zero snow accumulation
- super durable but lightwt construction throughout
- signal whistle on chest strap clip
- Tool pockets: Sleeves located on each side of the bladder pocket for shovel handle and probe
- expandable lid -creates a more versatile size range
- oversize skis straps on side which fit the latest generation of fat skis
- all buckles same size for easy emergency repairs
- hydration compatible
- extended Daisy chains for easy attachments
- hip belt gear loops
- retro "Leather" patches
- large pull tabs on zippers for gloves and mitts
- 30 liters / wt. 1400gr

### EH EDGE

*This is a great skiing day pack, the back panel access design is perfect for winter conditions, allows you super easy access in the snow. The Edge has a very efficient design for packing all the tools necessary for a great day touring. And it is super stable on your back regardless of the terrain, speed or whatever else you happen to be doing. - E.H.*

- Colour: Classic Khaki
